Contents:

CHAPTER 1. CATEGORIES

1.1 1.1. Category

A Category is a means of grouping your events or other Categories together. In Indico *Home* is the top level category from where you start. Inside a category you can:

- add events or other sub-categories,
- set access rights to say who can access or modify,
- re-allocate the sub-categories,
- remove the sub-categories,
- and also delete the current category and everything inside it.

These features are accessible through the menu *Manage* (you must be logged in and with modification rights in order to see it), that you can find close to the big orange category name. After clicking *Manage* (more specifically its inner option *Edit category*) you will be accessing the Management area for Category.

1.2 1.2. Creating a Category

From the menu *Manage* (more specifically its inner option *Add subcategory*) you can create a new category. You will need to have an Administrator's account or be listed in the modification list ([see Protection](#)) for the category.

Also you can create it from the Management area, from the menu *General settings* ([See General Settings](#)) and by clicking the button *add subcateg.*

1.3 1.3. Category Management Area

1.3.1 1.3.1. General settings

In the Category Management Area, the first option in the menu is *General settings*:

You can modify the details of the category:

- Name
- Description
- Timezone
- Icon
- Default style (layout) for meetings created within this category (see Meetings)
- Default style (layout) for lectures created within this category (see Lectures)

and you can modify its content:

- Add a new sub-category
- Re-allocate (move to another category) some events or categories
- Remove the inner events or categories

1.3.2. Protection

From the Management Area you can protect your category using the three controls for access levels: Modification control, Access control, and Domain control. You can add Users or Groups to the Modification and Access control lists.

Modification Control Category Managers can be added to a category to allow access to the Management Area for modification. Category managers are either those listed in the modification control list, or Indico administrators. The creator of a category will be able to modify it without being listed.

Access Control A category can be public or private; Public: Anyone can view a public category and any user can add events to it. However, users will only be able to see the events inside the category to which they have access. Private: Only those users in the access list or administrators can access the category and add events. When a Category is made private, the option for domain control is omitted and any event or category made inside it will also be private. The category will be displayed with “(protected)” after its name to show it is private.

Domain Control The access to the Category can be restricted by domain. Therefore, just the users from the chosen domain will be able to access (e.g. If we choose the domain CERN, just users from inside CERN will be able to access the category and its content).

Conference Creation Tool You can restrict who is able to add events to the category. If you restrict it, you need to add users or groups to the list in order to allow them to add events.

Conference creation control

Current status **OPENED** (**RESTRICT it**)

Users allowed to create conferences

Notify event creation to: (email addresses separated by semi-colons)

See Protection System in order to know more about Protection in Indico.

1.3.3 1.3.3. Detail Modification & Sub-Category/Event Organisation

The details of a Category can be modified and sub-categories can be organised from the *General settings* tab in the management area. Details can be modified by clicking on modify inside the main tab. Sub-categories and events can be organised in the particular order in which you wish to view them by using the order drop down box next to each sub-category.

Contents

<input type="checkbox"/>	1	sub category 1
<input type="checkbox"/>	2	sub category 2

You can re-allocate a sub-category or event by selecting the one you wish to move using the tick box and clicking on re-allocate, you will then be asked to where you would like to reallocate this sub-category/event.

To remove a sub-category and anything it contains or an event, select it and click *remove*. If it contains anything you will be asked if you are sure you want to delete it.

1.3.4 1.3.4. Deleting a Category

To delete the current category you can go to the Tools menu in the Management Area and select 'Delete this category' you will be asked to confirm the deletion first.

CHAPTER 2. CONFERENCES

2.1 2.1. Conference

A conference is the most comprehensive event in Indico. You should be able to manage its complete life-cycle, for instance, among other functionalities you can setup:

- a conference web portal fully customizable
- the programme definition (with themes/topics/tracks)
- a registration form with e-payment capabilities
- a call for abstracts to be submitted
- an abstract review process
- a timetable with many sessions and presentations
- slides and papers submission by authors
- an evaluation form in order to get feedback after the conference
- emails to participants

2.2 2.2. Creating a Conference

In order to create a conference, you just need to click on *Create event* and *Create conference*, in blue bar at the top of the page. You will be presented with a form in which you:

1. choose the category where you want to place your conference and
2. fill the details of the conference you wish to create.

Once this is done your conference will be created and you will be redirected to the Management Area of the conference. If you want to see the Home page of your conference, click in the link *View event page*.

The creator of this conference will by default have modification rights to it and is referred to as a Conference Manager as is anyone else listed in the Modification control list.

Remember that the category, in which you want to create your conference, must be public or you must have access rights to it.

To access the Management Area of a conference you need to click on the modification icon  in the top bar of the event home page.

2.3 2.3. Setting up a Conference

Once your conference has been created the Conference Manager can start setting up the conference from the Management Area.

- Set up your Access Control to restrict or allow users the rights to access or modify the conference (see [Access Control Management](#)).
 - Look at customizing the look of your conference when users come to view it (see [Layout Management](#)).
 - Start adding Tracks to your conference to define areas to help with organisation. A Track Manager can be assigned to each track to co-ordinate which abstracts to accept into these tracks (see [Programme Management](#)).
 - Start calling for abstracts. Abstracts are proposed contributions to your conference. By default, when you first create a conference, calling for abstracts is disabled. You can enable this in *Abstracts* (see [Abstracts Management](#)).
 - Start looking at which submitted abstracts you wish to accept into your conference, they will then become contributions (see [Contributions Management](#)).
 - Start setting up a Timetable to organize what will be happening where, and when, and what contributions, materials, etc, will be included (see [Timetable Management](#)).
 - If those that will attend your conference need to register, give details concerning their needs while at the conference, or pay the fees, you can set up a registration form (see [Registration Management](#)).
 - There are options to make offline versions of your conference, to clone your conference, and to perform other tasks on the whole of your conference once you set it up (see [Conference Tools](#)).
-

2.4 2.4. Conference Management Area

The Management Area allows you to control, manage, setup and modify the different parts of your conference. The following sections will show each area of the Conference Management.

Clicking on the link *View event page* will take you to the home page of the event.

2.4.1 2.4.1. General Settings

Title	Hengstberger Symposium "Extra Dimensions and Mini Black Holes" (edit)
Description	The goal of the Symposium is to bring together theoreticians and experimentalists in the fields of particle physics, astrophysics, cosmology and gravity, in order to discuss the present status of the searches for signatures of extra dimensions. The discussion should be held especially considering the upcoming data taking at the Large Hadron Collider. A particular focus will be put on the hypothetical production of mini black holes predicted by models of extra dimensions. (edit)
Place	Location: CERN Room: TE Auditorium Address: (edit)
Start date	24/06/2009 08:00 (edit)
End date	25/06/2009 18:00 (edit)
Timezone	Europe/Zurich
Additional info	Participation by invitation only. (edit)

2.4.2.1. Tracks

Tracks are parts of the conference to which abstracts and contributions can belong. Inside tracks you can do the following:

- General settings:
 - Modify the Code: a code can be used if you prefer to use codes as opposed to using long titles. This codes will be used in listings for contributions and abstracts.
 - Modify the Title and the Description of the track.

- Abstracts: Show any abstracts which have been submitted to the Track, the Track Manager can then propose to accept or reject it. Only the Conference Manager can have the final say in whether an abstract is accepted or rejected (see [Abstracts Management](#)).
- Contributions: Show any contributions that belong to that Track (see [Contributions Management](#)).

2.4.3. Contributions Management

The Contributions menu shows all the contributions to the conference. These may be either accepted abstracts or abstracts added by the Conference Managers.

<input type="checkbox"/>	1	23-May-2009 08:20	00h20'		Contribution 2				S	

Total Duration of Selected: **0h40m**

From the Contributions menu you can:

- Create new contributions
- Access contributions ([see Contributions](#)).
- Search for certain contributions
- Move contributions
- Create a PDF of contributions
- Show the authors of contributions
- Create a zip file of material from contributions
- Create a zip file of the whole proceedings.

You can also filter the list of contributions by session, track, contribution type, status (scheduled, not scheduled, withdrawn) and material. In order to open the filtering criteria, you must click in the small arrow close to *Filtering criteria*, choose the options you want to match, and press the button *apply filter*.

2.4.3.1. Contributions

Each contribution has its own management area.

From inside the Main tab you can:

- Modify the main details of the contribution, for example, name, duration, etc.
- Change the track to which this contribution is assigned.
- Change the session in which this contribution is included (see [Timetable Management](#)).
- Add/change authors and co-authors.
- Add/change the presenters of the contribution.
- Withdraw the contribution from the Conference.

From the Material tab you can add and access the material of the contribution (see [Material](#)).

From the Sub-contributions tab you can:

14

Chapter 2. Chapter 2. Conferences

- Add/remove a sub-contribution.
- Change the order of sub-contributions by using the drop down priorities.
- Access each sub-contribution by clicking in its title ([See Sub-contributions](#)).

From the Access Control tab you can:

- List the users that can submit material ([see Material](#)) to the contributions, by default nobody can submit material, we need to specify it.
- List the users that can modify the contributions.
- Make the contribution Public or Private:
 - *Public*: Any user can view (not modify) the contributions.
 - *Private*: Only users listed in the access/modification/submission control can access the contribution.

- List the domains (e.g. CERN domain) that can access the contribution (this is only available if the contribution is public)

From the Tools tab you can:

The screenshot shows the 'Tools' tab for 'Contribution: Contribution 1'. On the left is a sidebar with navigation links: View event page, General settings, Timetable (highlighted), Material, Room booking, Programme, Abstracts, Contributions, Registration, Video Services, Layout, and Evaluation. The main content area has tabs for Main, Material, Sub Contribution, Protection, and Tools (selected). Below the tabs is a large wrench icon. To the right of the wrench are three actions: 'Delete this contribution' with a red trash icon, 'Move this contribution' with a blue arrow icon, and 'Write minutes for this contribution' with a blue notepad icon. At the top right of the main area, there is a link 'Go back to: Timetable'.

- Delete the contribution.
- Move the contribution.
- Write the minutes for the contribution, these will be attached to the material for the contribution (see Material).

2.4.3.2. Sub-contributions

Sub-contributions can be added to a contribution to organize the contribution further.

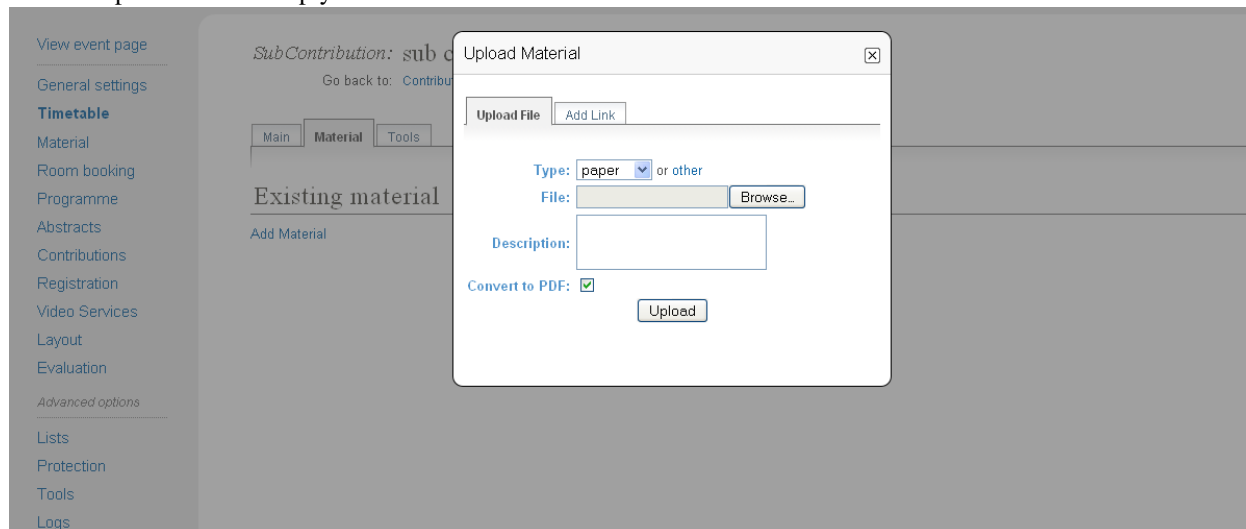

The screenshot shows the 'Main' tab for 'SubContribution: sub contribution 1'. The sidebar is similar to the previous one but includes 'Advanced options' and 'Logs' at the bottom. The main content area has tabs for Main, Material, and Tools (selected). Below the tabs, there is a form with the following fields: Title (sub contribution 1), Description (Sub contribution description), Place, Duration (00h15'), and Keywords. Below these fields is a section for 'Presenters'. At the bottom, there is a 'Report numbers' section with a dropdown menu showing '- select a system -' and an 'add' button. A link 'Go back to: Contribution 1 (Contribution) >> Timetable' is at the top right.

From inside each sub-contribution you can modify the general details, add or remove presenters, and attach material in the same way as you can for contributions. From the Tools tab in a sub-contribution you can delete that sub-contribution or write the minutes for it, these will be attached to the material for the sub-contribution.

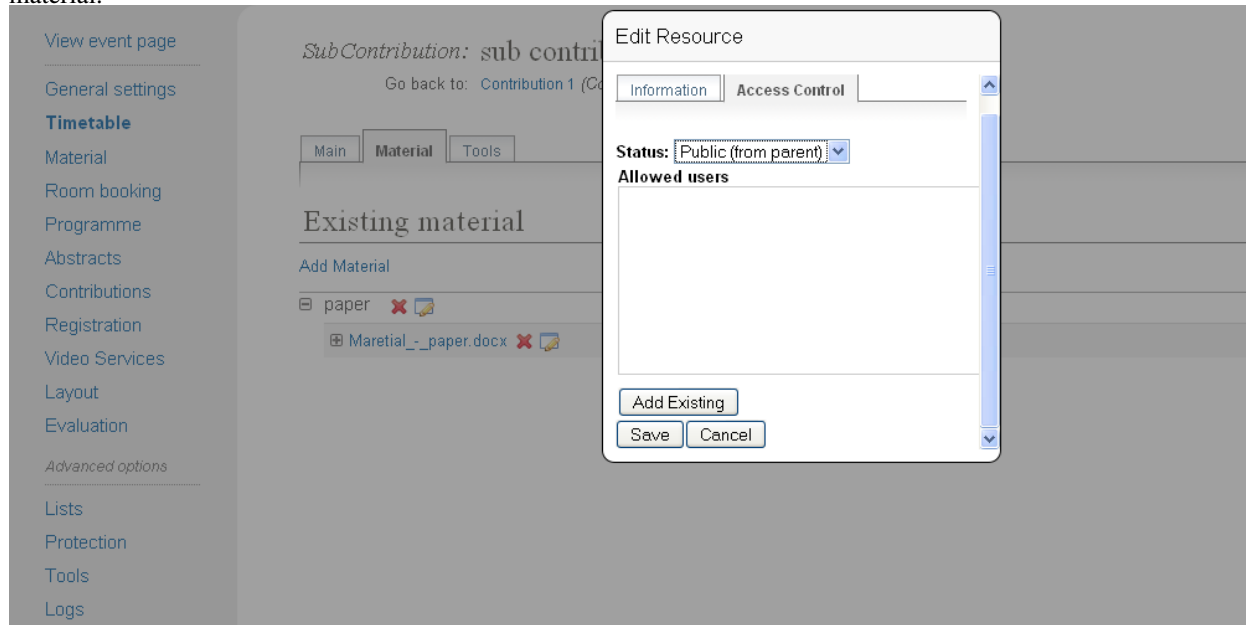

2.4.3.3. Material

Material can be submitted by a user once the abstract has been accepted and made into a contribution. Material can also be added by the Conference Manager directly to the conference, or to a contribution or sub-contribution.

You can upload files or simply add URL links.

Access rights can be set for each material. From inside Access Control you can list those users that can view the material.

2.4.4. Abstracts Management

The Abstracts Management in Indico has four tabs:

- Setup: configuration of the call for abstracts.
- Preview: preview of the submission form.
- List of Abstracts: all the abstracts that have been submitted or created by the organizers.
- Book of Abstracts Setup.

2.4.4.1. Call for Abstracts Setup

The call for abstracts needs to be enabled first from the *Setup* tab. From here you can set:

- Submission period: dates between authors can submit abstracts.
- Modification deadline: deadline for any abstract modification.
- Announcement: information displayed in the home page of the event when accessing the call for abstracts menu.
- Submission notification: email addresses that will receive an email every time someone submits an abstract. You can also add any
- Misc. options: in the abstract submission, the author must choose the tracks or topics for his abstract. The conference organizer can make the choice mandatory and multiple.
- Abstract fields: you can add/remove more fields to the abstract submission form.
- Late submission authorised users: users that can submit abstracts after the deadline.
- Notification templates: [see Notification Template](#).

2.4.4.1.1. Notification Template

A notification template is an email template that the conference organizer can pre-defined and that will be automatically used by Indico under certain circumstances (when an abstract is accepted, rejected or merged).

In order to create a Notification Template you have to:

1. Go to Abstracts menu, Setup tab and scroll down in that page. You will see the section *Notification templates*.
2. Click in *add* button and fill up the form. Here the definition for each field:
 - (a) Title: This is just a title for the notification template. It is just a definition of the template. It will not be used in the email.
 - (b) Description: This is just a description for the notification template. It will not be used in the email.
 - (c) From address: the FROM address in the automatic email.
 - (d) To addresses: who will receive the email, submitters and/or primary authors of the abstracts.
 - (e) CC addresses: extra email addresses that will receive the notification.
 - (f) Subject: subject of the email.
 - (g) Body: body of the email. You can customize the body by adding special tags on it. This tags will be replaced with the information of the abstract like: title, id, URL, submitter family name, etc. Be careful to write perfectly the tags or the email will not work. The format is something like this:

```
%(conference_title)s
```

1. Save the template. You will see your template in the list.
2. Click in the title of the template and access its management area.
3. Set the condition under with the email will be sent:
 - (a) choose the condition: in status ACCEPTED, REJECTED or MERGED.
 - (b) click *create new condition*.
 - (c) For ACCEPTED and REJECTED, you need to specify if this applies to any contribution type and track, or just to a concrete one.
 - (d) submit the condition.
4. Done. This template will be used under the condition that you have chosen on the step 5. Therefore, Indico will automatically send the email of step 2 to the email address specified on step 2.4. and 2.5.

Notification Template: accepted

merge selected abstracts
get PDF of selected abstracts
get author list of selected abstracts

Total : 3 abstract(s)

From the List of Abstracts tab you can add new abstracts, create PDFs of the abstracts, create an XML file of abstracts, and obtain the authors list. You can also access each abstract [see Abstracts](#); an abstract can be in one of 10 states:

- Accepted (A)
- Rejected (R)
- Proposed Rejection (PR)
- Withdrawn (W)
- Merged (M)
- Submitted (S)
- Under Review (UR)
- Duplicated (D)
- Proposed Acceptation (PA)
- Conflict (C)

As for contributions, there is a *Filtering criteria* panel that you can open by clicking in the little gray arrow. You can choose the type of abstracts you want to display and apply it to the list.

2.4.4.3. Abstracts

An abstract is either submitted by a user or manually added by a Abstract Manager (conference organizers). Once an abstract is accepted it is automatically changed into a contribution and added to the contributions list in the conference (see [Contributions Management](#)).

Contribution

From inside Abstract Management, the Conference Manager can change the status of an abstract, for example, by accepting it or marking it as a duplicate.

The main details of the abstract can be modified and the track to which it is associated can be changed as well as the user that submitted it. Any comments made by the Track Manager or Conference Manager while changing the status of the abstract can be viewed from the tab *Track judgments*.

Notification log

Track	Judgment	Judged by	Date	Comments
Track 1	Proposed to accept	TURNER, vanessa (com)	24 January 2005 10:22	proposed to accept comment

Internal comments can be made from the tab *Internal comments* (it's like a message box). And a notification log, with the emails sent to the author, can also be viewed from inside the tab *Notification log*.

2.4.4.4. Book of Abstracts

The *Book of Abstracts* tab lets you add any additional comments that you would like to appear in the first page of the book of Abstracts. This is a PDF file which can be generated from the conference home page (see [Conference Display](#)) containing all the abstracts.

22

Chapter 2. Chapter 2. Conferences

2.4.5 2.4.5. Timetable Management

You can organise your conference from the Timetable tab in a conference. When you start with a timetable it will look like this:

[View event page](#)

[General settings](#)

[Timetable](#)

[Material](#)

[Room booking](#)

[Programme](#)

[Contributions](#)

[Registration](#)

[Video Services](#)

Timetable (from Thu 21/01 to Mon 25/01 [\[edit\]](#) Timezone: Europe/Zuric)

Thu 21/01	Fri 22/01	Sat 23/01	Sun 24/01	Mon 25/01
-----------	-----------	-----------	-----------	-----------

08:00

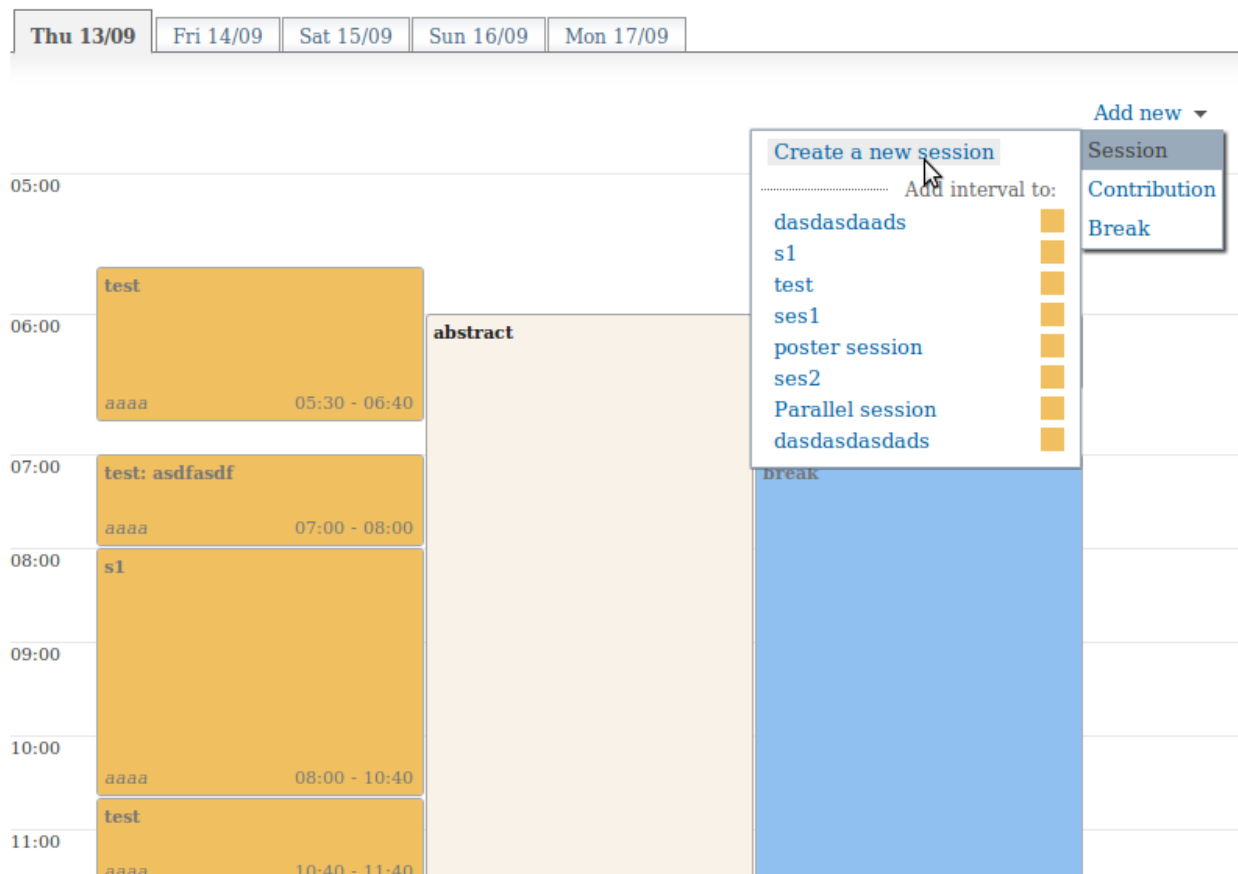

09:00

10:00

11:00

You can modify the start and end dates of the timetable, and you can start adding sessions, breaks, and contributions to your timetable.

Timetable (from Thu 13/09 to Mon 17/09 [edit] Timezone: Europe/Zurich)

In order to edit the entries in the timetable, you just need to click on the entry box and edition balloon will show up.

2.4.5.1. Sessions

A session is essentially a time interval within which you organise many presentations of your conference. You can create sessions base on different reasons:

- You could use a session for each track, for example.
- There can also be more than one session scheduled at the same time (parallel sessions).
- The same session can also be happing in different time intervals. For example, you may have a morning interval, then a break, and then an afternoon interval within the same session. Also, one day you have a session on a particular subject for a couple of hours and then two days later you may have another session on that subject. This can be done using *Add new > Session > Add interval to:* an already existing session (see previous image).

2.4.5.2. Adding Sessions and Breaks to a Timetable

To add a session to your timetable, use the menu *Add new* and the option *Session > Create a new session*, at the top of the timetable. This will present you with a form that you fill in with the details of your session. Once the session is created it will appear in your timetable.

Add Session

Address

Date 2012/09/13

Time -

Color

Convener(s)

Session type ☒ Standard ☐ Poster

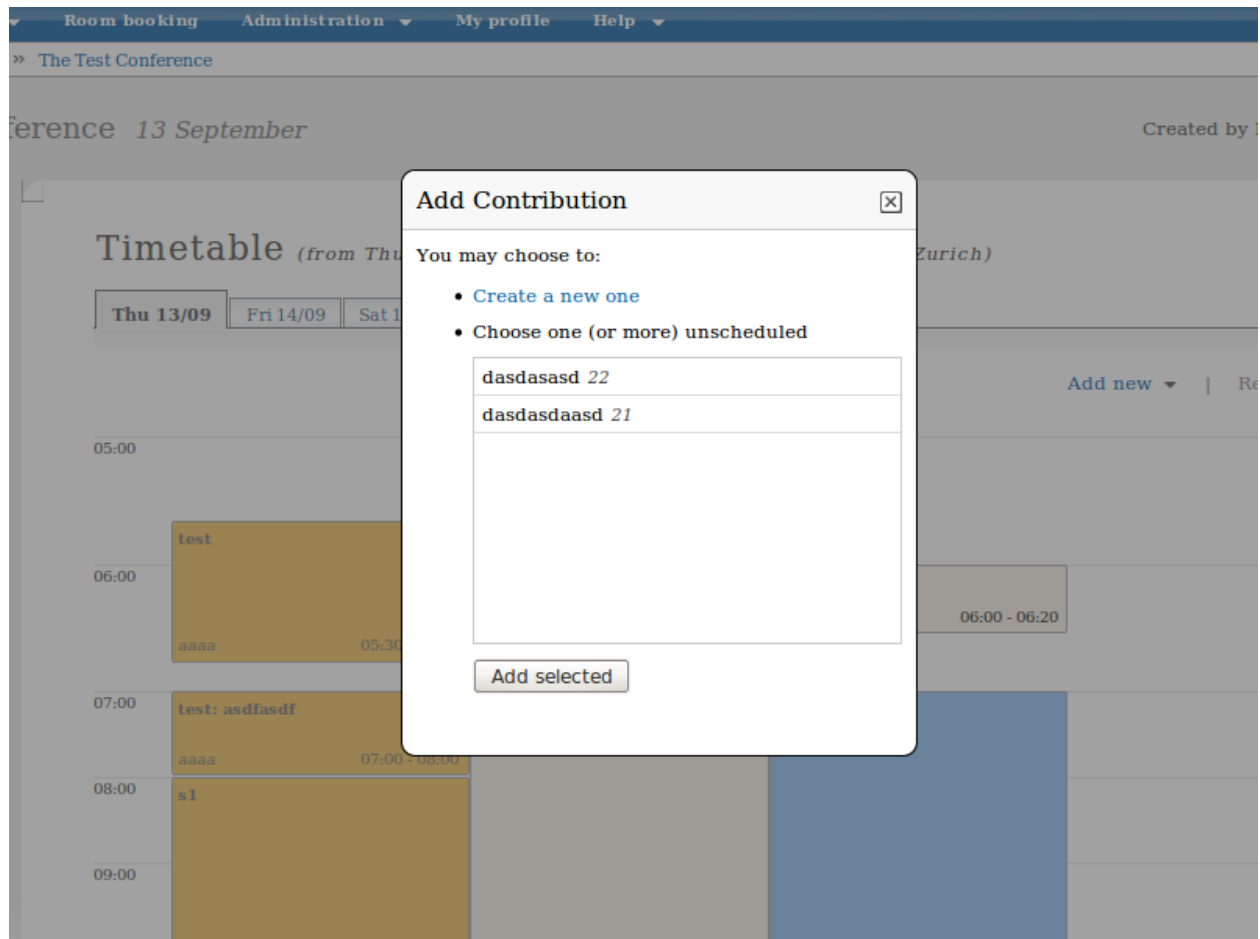

From the same menu *Add new* but in the option *Break* you can add a break.

In order to modify sessions and breaks, you need to click on the entry and an edition balloon will be displayed. For sessions, you can edit their inner timetable with their own contributions and breaks, from the edition balloon and the link *View and edit current interval timetable*.

2.4.5.3. Adding Contributions to a Timetable

To add a contribution to your timetable use the option *Add new > Contribution*. Here, there are two possible situations:

1. If there are already some unscheduled contributions (see [Contributions Management](#)), Indico will show a list of then in which you can select the contribution(s) you want to add. Also, you can choose to create a new one.

2. If there are not unscheduled contributions, the form for the creation of a new contribution will be shown.

Add Contribution

2.4.5.4.1. Intervals

A session can happen in different intervals of time. If you already have a session (which will be like the first interval) and you want to add more intervals for that session, you can do it from the menu (in the top bar of the timetable) *Add new > Session > Add interval to:* an already existing session.

However, this is optional, intervals can be used when the session takes place over more than one period of time. For example, if you may have a morning interval, then a break, and then an afternoon interval within the same session. Also, you may have one day you have a session on a particular subject for a couple of hours and then two days later you may have another session on that subject.

2.4.5.4.2. Main Tab

From the Main tab in Session you can, modify the general session information and add conveners.

2.4.5.4.3. Contributions Tab

From the Contributions tab you can see all the contributions that are part of your session. These contributions will only be shown once they have been added (see [Adding Contributions to Sessions](#)).

2.4.5.4.4. Protection Tab

From the Protection tab in Session you can set the access rights for modification, access, and domain control in the same way as you can for the conference (see [Protection Management](#)). The only difference is the Co-ordination control in which you can assign someone to be the Co-ordinator, which means they can add and remove contributions and breaks to that particular session.

2.4.5.4.5. Tools Tab

From the Tools tab in Session you can delete that session or write minutes for the session.

2.4.5.4.7. Adding Contributions to Sessions

Inside sessions, you can create new contributions from the timetable or add unscheduled contributions (which have already been created and will be placed in the timetable later on). Here, we will see how to add/import contributions that have already been created.

To add contributions to a session you first need to import them from the main conference, to do this use the *Contribution* tab inside the session:

Session: test

2.4.6. Protection Management

Protection in a conference is similar to that in a Category (see Protection). There is Modification Control, Domain Control and Access Control. When adding to the Access and Modification lists, you can also add Groups of users if any have been defined by Administration.

Modification Control Only the Managers listed in the Modification Control, the Creator of the conference, and any Administrators can access the Management Area of the conference. However, you can add a Modification Key which means anyone with this key can modify the conference without logging in.

Access Control When the conference is public, anyone can view the conference including the programme, timetable, abstracts, etc. When the conference is private, only those in the Access List, Conference Managers and Administrators can view the conference.

When private you can also add an Access Key which means anyone with this key can access the conference without logging in. Users will get a message as the following:

[Home](#) [Create event](#) [Room booking](#) [My profile](#) [Help](#)

This event is protected with a modification key.

Please enter it here:

Domain Control This option is only for public events. It allows to specify which domain (e.g. CERN) can access the conference. Therefore, just people from inside this domain will be able to access.

2.4.7. Registration Management

You may wish to have some kind of registration process for those attending your conference. Here you can give the registrants options such as accommodation or any specific needs. The Registration Management comes in two parts: the Registration Form and the Registrants.

2.4.7.1. Registration Form

You can access the registration module from the option *Registration* in the menu of the left.

From the Setup tab you can enable or disable the registration. You can also modify the start/end dates of registration, the maximum number of registrants you will take, any announcements and if you want to receive an email when a new registrant applies.

Statutes definition

add status

• No statutes defined yet.
 remove status

You can use this option in order to create general statuses you will be able to use afterwards in the list of registrants. For instance, you can create a status "paid" in order to check if someone has paid or not.

The registration form is split in *sections*. Each section is an part in the registration form with many fields in it. You can choose which sections of the form you wish to use (see the following sections listed below). To enable or disable

one of these sections, click on the  image next to that section, when it is red it is disabled and when it is green it is enabled. Clicking on the section name will let you modify it to allow the registrants to enter the information you need (see [Registration Area](#)).

2.4.7.1.1. Reason for Participation

The Reason for participation form allows you to ask the registrant why hey wants to participate. From this form you can modify the question and title of the form.

2.4.7.1.4. Social Events

The Social Events form allows you to add/remove any social events for which registrants can register. When you add an event you add the title of this event.

The screenshot shows the 'Registration form Section: Social Events' page. On the left is a sidebar menu with options: View event page, General settings, Timetable, Material, Room booking, Programme, Contributions, **Registration**, Video Services, Layout, and Evaluation. The main content area has a 'Main' tab selected. It displays the following fields: Title (Social Events), Description (Select the social events you would like to attend and how many places you will need:), Introduction sentence, and Selection type (Multiple choice). There is a 'modify' button next to the Selection type field. Below these fields, there is a section for 'Social event entries' with 'remove' and 'add' buttons.

2.4.7.1.5. Further Information

The Further Information form gives you the opportunity to add any additional information for the registrants.

The screenshot shows the 'Registration form Section: Further information' page. The sidebar menu is identical to the previous screenshot. The main content area has a 'Main' tab selected. It displays the following fields: Title (Further information) and Content (Content of Further information). There is a 'modify' button next to the Content field.

2.4.7.1.6. General Sections

From the button *New sect.*, you can create a customizable section for your form. Inside the section, you can create any number of fields from different kinds (text, textarea, checkbox, etc). Also, this fields will have the option to be *billable*, meaning that they can have a price attached. Therefore, the form can be used with online payment system.

2.5 2.5. Conference Display Area

The Conference Display is the view that users of the conference will see. If the conference is public they will not need to log in to view the conference. It is also the area in which you can access the modification areas if you have access rights. The different areas of the conference can be seen using the left-hand Display Menu. This menu may be different if the Conference Manager has customized the menu. When a conference is accessed the *Overview* area is shown first.

2.5.1 2.5.1. Navigating the Conference Display Area

Various parts of the conference display are always present in order for you to navigate or view the display area:

This is placed at the top left of the display view and will take you back to home page of Indico.

This will be underneath the display menu and enables you to email the event support if conference management have entered one.

This is placed at the top right of the screen and is the access for logging in or out.

2.5.2 2.5.2. Overview Area

The Overview Area shows the main details of the conference including any material that is included and the date and location of the conference.

The screenshot shows the top navigation bar with a home icon, navigation arrows, and a search icon. On the right, it displays 'Europe/Zurich', 'English (USA)', and a 'Login' button. Below this is a blue header with the title 'Hengstberger Symposium "Extra Dimensions and Mini Black Holes"'. Underneath the header, it shows the dates '6-10 July 2009' and the location 'CERN'. A search bar with a 'Search' button is also present.

Overview

[Scientific Programme](#)

[Timetable](#)

[Contribution List](#)

[Author index](#)

[Registration](#)

[Registration Form](#)

The goal of the Symposium is to bring together theoreticians and experimentalists in the fields of particle physics, astrophysics, cosmology and gravity, in order to discuss the present status of the searches for signatures of extra dimensions. The discussion should be held especially considering the upcoming data taking at the Large Hadron Collider. A particular focus will be put on the hypothetical production of mini black holes predicted by models of extra dimensions.

Dates: from 06 July 2009 08:00 to 10 July 2009 18:00

Location: [CERN](#)

Room: [TE Auditorium](#)

Chairs: Dr. Lendermann, Victor

Dr. Groot Nibbelink, Stefan

Additional info: Participation by invitation only.

2.5.3 2.5.3. Call for Abstracts Area

The Call for abstracts view will show the range of dates during which an abstract can be submitted.

The screenshot shows the top navigation bar with a home icon, navigation arrows, and a search icon. On the right, it displays 'Europe/Zurich', 'English (USA)', and 'Logged in as: Angelova, C.'. Below this is a blue header with the title 'Hengstberger Symposium "Extra Dimensions and Mini Black Holes"'. Underneath the header, it shows the dates '6-10 July 2009' and the location 'CERN'. A search bar with a 'Search' button is also present.

Contribution 1

Id: 0

Place: CERN
Room: TE Auditorium

Starting date: 06-Jul-2009 08:00 (Europe/Zurich)

Duration: 20'

Primary Authors: Mr. AUTHOR 1

Material: Existing material

Add Material

Sub-contributions: [sub contribution 1](#)

If you have modification rights, you will have the modification icon next to the print formats and you can access the Contribution Modification Area.

2.5.5.1.1. Contribution Material Display

The material that belongs to a contribution can be viewed by accessing the Contribution Display (see [Contribution Display](#)). Here, there is a section *Material* with all the resources attached.

The screenshot displays the 'Contribution Material Display' interface. On the left is a sidebar with the following links: Overview, Scientific Programme, Call for Abstracts, View my abstracts, Submit a new abstract, Timetable, Contribution List, Author index, My conference, Book of abstracts, Registration, and Registration Form. The main content area is titled 'Contribution 1' and contains the following metadata:

- Id:** 0
- Place:** CERN (Room: TE Auditorium)
- Starting date:** 06-Jul-2009 08:00 (Europe/Zurich)
- Duration:** 20'
- Primary Authors:** Mr. AUTHOR 1
- Material:** Existing material

Below the metadata is an 'Add Material' link. A list of materials is shown, including 'paper' and 'Maretial_-_paper.docx'. The 'Maretial_-_paper.docx' entry is expanded, showing details:

- File Name:** Maretial_-_paper.docx
- Size:** 0 KB
- Creation Date:** 03.07.2009 13:57:19

At the bottom, the 'Sub-contributions' section lists 'sub contribution 1'.

Click in *Add Material* in order to upload more, in the edit icon to modify, or in the red cross to remove it.

2.5.6 2.5.6. My Conference Area

The *My conference* area gives you access to those areas for which you have Co-ordinator modification rights. For example, if you are a Track Co-ordinator or a Session Co-coordinator those tracks or sessions will appear under *My conference*.

If you are a Session Co-ordinator or a Session Manager you will have the modification icon in the top right-hand corner as above. This will take you to the appropriate Modification area for that session. You may also make a PDF of the session.

CHAPTER 3. MEETINGS

3.1 3.1. Meeting

A Meeting is not as in depth as a Conference and is made for smaller events. Within a Meeting you can find two main modules:

- Participants: you can add all the participants for the Meeting or you can open the participation so users can apply for it.
- Timetable: in which you can directly add Sessions, Contributions, and Breaks.

As well, as for conferences, you can set the Access Control for the meeting and you have Tools in which you can remove, clone, and set alarms.

3.2 3.2. Creating a Meeting

If you have the correct access rights within a Category you can create a new meeting using the blue top bar *Create event* option. You will be presented with a form similar to that for a Conference; you are able to choose the default style in which the Meeting will be displayed ([see Meeting Display Area](#)). When you submit this form the Meeting will be created and you will be redirected to its Management Area.

3.3 3.3. Meeting Management Area

The Management Area allows you to control the different parts of your meeting. The following sections will show each area of the Meeting Management.

Clicking on the link *View event page* will take you to the management display area for the meeting.

3.3.1 3.3.1. General Settings Management

From the Main tab, you are able to modify the details of the meeting including title, description, location, default style of the display. You can also add/remove any chairpersons.

3.3.1.1. Meeting Visibility

This option allows you to choose up to which level your meeting will be visible in the overview pages.

3.3.2 3.3.2. Timetable Management

The Timetable Management allows you to organize your meeting by using sessions (groups of contributions), contributions (presentations), and breaks.

The management of the timetable is the same as for conferences. The only difference is while adding contributions. In conferences, you can add unscheduled contributions to the timetable. On the other hand, in meetings, unscheduled contributions don't exist, you need always to create the contribution.

Here, we will just explain how to create contributions. For more details and further explanations about the Timetable Management (see Timetable Management for Conferences).

3.3.2.1. Adding Contributions

You can directly add contributions into your timetable using the *Add new > Contribution* at the top of the timetable. This will open a pop-up with a form to create a new contribution.

In order to edit the contribution, you can click on it and a edition balloon will show up. In this balloon, you can modify the timing or the whole contribution.

3.3.2.3. Session Management

See Session Management for Conferences.

3.3.2.4. Contribution Management

See Contribution Management for Conferences.

3.3.3. Protection Management

Protection in a meeting is the same as that in a Conference. There is Modification Control, Domain Control, and Access Control. When adding to the Access and Modification lists, you can also add Groups of users if any have been defined by Administration.

Modification Control Only the managers listed in the modification control, the creator of the meeting, and any administrators can access the Management Area of the meeting. However, you can add a Modification Key which means anyone with this key can modify the meeting without logging in.

The screenshot displays the Indico Meeting Management Area with a sidebar on the left containing links: View event page, General settings, Timetable, Material, Room booking, Video Services, Participants, Evaluation, Advanced options, Lists, Protection, Tools, and Logs. The main content area is divided into four sections:

- Modification control:** Includes a 'Managers (users allowed to modify)' section with an 'Add user to list' button, and a 'Modification key' section with a masked input field and a 'change' button.
- Access control:** Shows the 'Current status' as 'PUBLIC' with a help icon. Below it are options to 'make it PRIVATE by itself' or 'make it ABSOLUTELY PUBLIC' with a help icon. There is also a 'Users allowed to access' section with an 'Add user to list' button, and an 'Access key' section with a masked input field and a 'change' button.
- Domain control:** Features an 'Allowed domains' section with a note '(if no domain is selected no control is applied)' and buttons for 'remove', 'Select', and '<- add'.
- Tools:** Contains three buttons: 'Grant submission rights to all speakers', 'Remove all submission rights', and 'Grant modification rights to all session conveners'.

Access Control When the meeting is public, anyone can view the meeting including the details, timetable, material, etc. When the meeting is private, only those in the access list, meeting managers, and administrators can view the meeting.

The screenshot shows the top navigation bar of the Indico interface with links: Home, Create event, Room booking, My profile, and Help. Below the navigation bar, a message states: 'This event is protected with a modification key.' Below this message is a form with the text 'Please enter it here:' followed by an input field and a 'go' button.

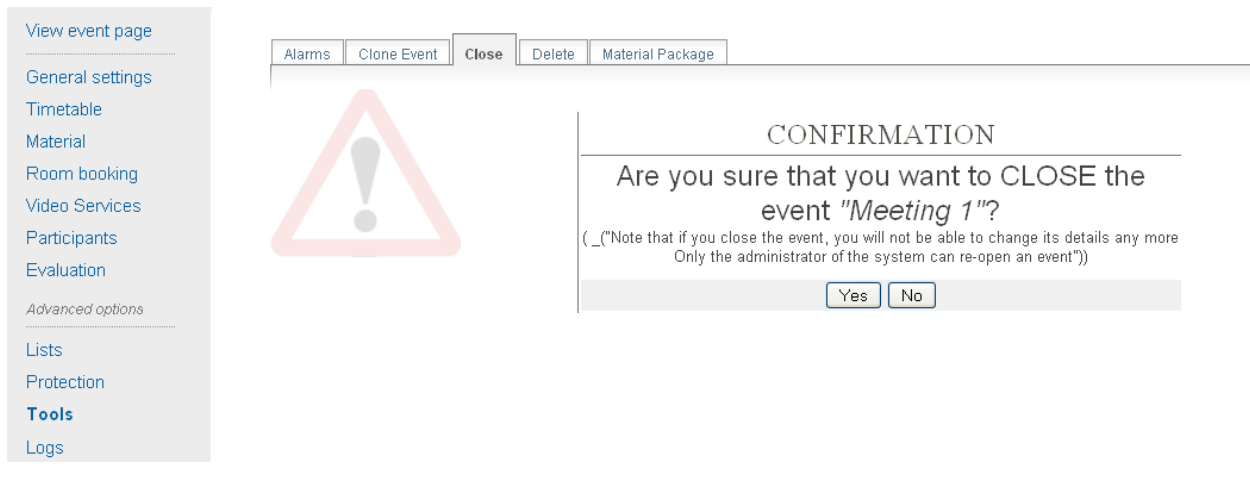

When private you can also add an Access Key which means anyone with this key can access the meeting without logging in.

Domain Control This is available for public meetings. It allows you to specify which domain can access the meeting. For instance, people from inside the CERN domain can access.

Material Visibility By default a material will always be visible in the timetable, even if it is private (the user will be redirected to a login screen or access key prompt when clicking on it). You can force the material to be hidden for non-authorized people by using the *Visibility to unauthorized users* section in the material access control page.

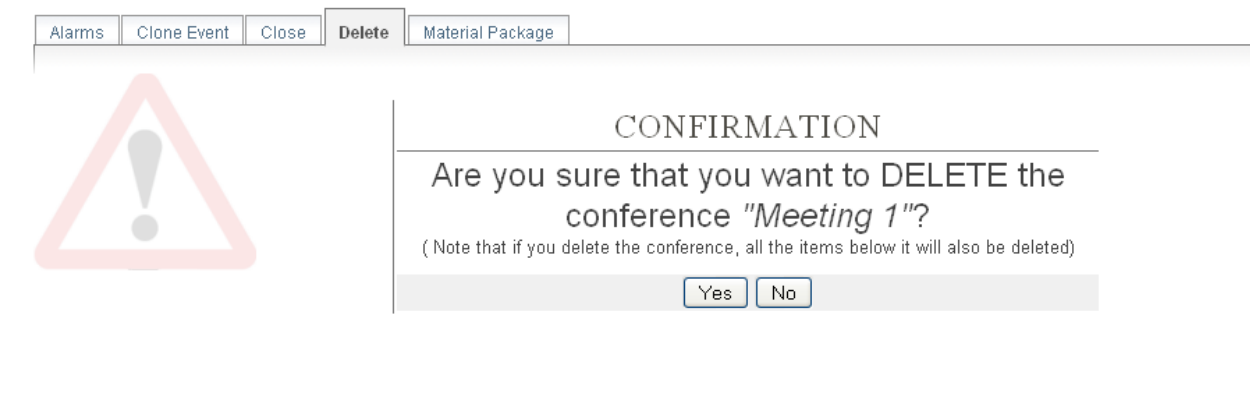

3.3.4. Tools Tab

The meeting Tools allow you to make certain actions on the whole of the meeting. See following sub-sections.

3.3.4.1. Deleting a Meeting

The Delete meeting option will delete the whole meeting. You will be asked to confirm deletion beforehand.

3.3.4.2. Cloning a Meeting

Clone the meeting if you would like to make another meeting exactly the same. You have the option to clone it once, at fixed intervals, or on certain dates.

3.4 3.4. Meeting Display Area

The Meeting Display is the view that users of the meeting will see. If the meeting is public they will not need to log in to view the meeting. It is also the area in which you can access the modification areas if you have access rights. There are various views/styles in which the meeting can be displayed; the following sections show the different views and displays.

3.4.1 3.4.1. Indico Style

This is the default view for meetings in Indico. If you have modification rights to any parts of the meeting you will be able to access the Management Area by clicking the icon .

CHAPTER 4. LECTURES

4.1 4.1. Lecture

A Lecture is the simplest form of event within Indico. A Lecture allows you to add material, give details about the lecture, and set the access control. You also have Tools in which you can remove, clone, and set alarms.

4.2 4.2. Creating a Lecture

If you have the correct access rights within a Category you can create a new lecture using the *Create event > Lecture* from the blue top bar. You will be presented with a form similar to that for a Meeting; you are able to choose the default style in which the Lecture will be displayed ([See Lecture Display Area](#)). After you submit this form the Lecture will be created and you will be redirected to its Management Area.

4.3 4.3. Lecture Management Area

The Management Area allows you to control the different parts of your lecture. The following sections will show each area of the Lecture Management.

4.3.1 4.3.1. General Settings Management

From the *General settings* menu, you are able to modify the details of the lecture including title, description, location, dates, speakers, and default style of the display.

+ Maretil_-_paper.docx

The material can be files or links. You also protect the material to control who has access to view the material.

4.3.2 4.3.3. Protection Management

Protection Management in a lecture is the same as that in a Meeting. There is Modification Control, Domain Control and Access Control. When adding to the Access and Modification lists, you can also add Groups of users if any have been defined by Administration.

Modification Control Only the managers listed in the modification control, the creator of the lecture, and any administrators can access the Management Area of the lecture. However, you can add a Modification Key which means anyone with this key can modify the lecture without logging in.

Access Control When the lecture is public, anyone can view the lecture. When the lecture is private, only those in the access list, lecture managers, and administrators can view the lecture.

When private you can also add an Access Key which means anyone with this key can access the lecture without logging in.

Domain Control This is available when the lecture is public. You can specify which domain can access the lecture. For instance, users accessing from a computer in the CERN domain will be able to access.

4.3.3 4.3.4. Tools Management

The lecture Tools allow you to carry out certain actions on the whole of the lecture.

CHAPTER 5. USERS AND GROUPS

5.1 5.1. Users

Recognized Users are either Indico locally registered users, NICE users, or users with CERN light-weight accounts.

5.2 5.2. Groups

Recognized Groups are either Indico locally created groups (only Administrators can create such groups), NICE groups, or e-groups. We strongly recommend the use of SIMBA lists as groups of users in Indico.

CHAPTER 6. EXPORTING INDICO DATA

6.1 6.1. To Personal Scheduler Tools (Outlook, iCal, korganizer...)

You can export an event or a set of events to your personal scheduler tool by using the Indico iCal export. When you see this icon , the link *iCal export*, or the menu *More > Export to Ical*, you can click on it to export the content of the page you are on to your scheduler tool.

On an event page, the event will be exported, on a category page, all events in the category will be exported. Some scheduler tools recognize multiple events (iCal, korganizer, Outlook 2007), others do not (Outlook 2003), in this case only the first event in the list is recognized.

You can also ask your personal scheduler tool to subscribe to one of these export URLs (this is particularly interesting for the Category export). For iCal: “Calendar” menu -> menu item “Subscribe”, then enter the URL of the iCal export. Finally, set the “Refresh” to “Every day”. Every day, your iCal software will update its content with any new event in the Category.

6.2 6.2. RSS feeds

Indico provides RSS feeds on each Category page. If your browser is RSS-aware, you will see an icon like this on the

browser menu bar: . Click on it to access the RSS feed, and subscribe to it using an RSS aggregator.

6.3 6.3. Sharepoint

If you maintain a Sharepoint web site, it is very easy to create inside it a web part exposing the forthcoming events from an Indico category. First add an XML web part, then in the “XML link” part, add the [XML export](#) URL from indico (eg. <http://indico.cern.ch/tools/export.py?fid=2112&date=today&days=1000&of=xml>) and in the “XSL link” part, add this URL: <http://indico.cern.ch/export.xsl>.

The result should look like this:

Coming UDS meetings			▼
2007-05-02	14:00	AVC section meeting	
2007-05-09	14:00	AVC section meeting	
2007-05-21	10:30	IT-UDS Group Meeting	

6.4 6.4. Using the export.py script

Indico allows you to programmatically access the content of its database by exposing its events through a web service, the export.py script.

A typical example of how to use this script is:

<http://my.indico.server/tools/export.py?fid=2112&date=today&days=1000&of=xml>

where:

- *fid* is the category from which you want to extract the events (can be a **+** separated list)
 - *date* is the starting date of the event (format: **yyyy-mm-dd** or **today**)
 - *days* is the number of days to export the events (starting on **date**)
 - *of* is the output format (one of **xml**, **html**, **ical**, **rss**)
-

CHAPTER 7. CONFERENCE ROOM BOOKING

7.1 7.1. Introduction

This chapter describes the Indico module for booking conference rooms.

Indico users can book conference rooms for their conference and meeting purposes. Bookings can also be standalone - they do not have to be bound to any event. Room managers can monitor and moderate all bookings. Indico administrators can create rooms and manage their data.

Instead of being a boring manual no one ever reads, this file is an introduction. This assumes you have some intuition of how the web works. The suggested way of learning is to start with a tutorial, then play with the module on your own. Simply use the software as any other Web page. Read context help along the way. Finally come back for some tips.

7.2 7.2. The Tutorial

You may want to read the Core Features listing to grasp the capabilities of the room booking module capabilities. To summarize, it is for booking conference rooms.

The screenshot shows the Indico web interface. At the top, there is a header with the Indico logo and the text "The Indico tool allows you to manage complex conferences, workshops and meetings." Below this is a navigation bar with links: Home, Create event, Room booking (highlighted with a red circle), Administration, My profile, and Help. On the right side of the header, there are links for "Europe/Zurich", "English (USA)", "Logged in as Angelova, C.", "Login as...", and "Logout". The main content area is titled "Main categories" and lists several categories with their respective counts: Category 1 (3), TESTING with IE (7), The title fixing (17), sub category (0), Fix (9), Testing development 1 (19), and training with the reviewing (2). On the right side, there is a "News" section with a "Write a title" link and a "View news history" link. Below the news section is an "Upcoming events" section.

Powered by CERN Indico 0.96.1.20080530

7.2.1 7.2.1. Getting into Room Booking Module

To use Indico::CRBS directly, just click *Room Booking* on Indico home page. To book rooms for your event, go to the event management page and click *Room Booking* option. In both cases you will be asked to sign in. Use your Indico credentials.

7.2.2 7.2.2. The First Page

The Room Booking Module first page depends on who is logged in. For most people, it will show a list of their bookings. The *My bookings* menu option will give you the same list. Room managers will see bookings of rooms they manage, so they can quickly see what's going on. If you are a room manager, use the *Bookings in my rooms* menu option to show this page again. (This menu option is not visible for ordinary users).

7.2.3 7.2.3. The Most Important Tip

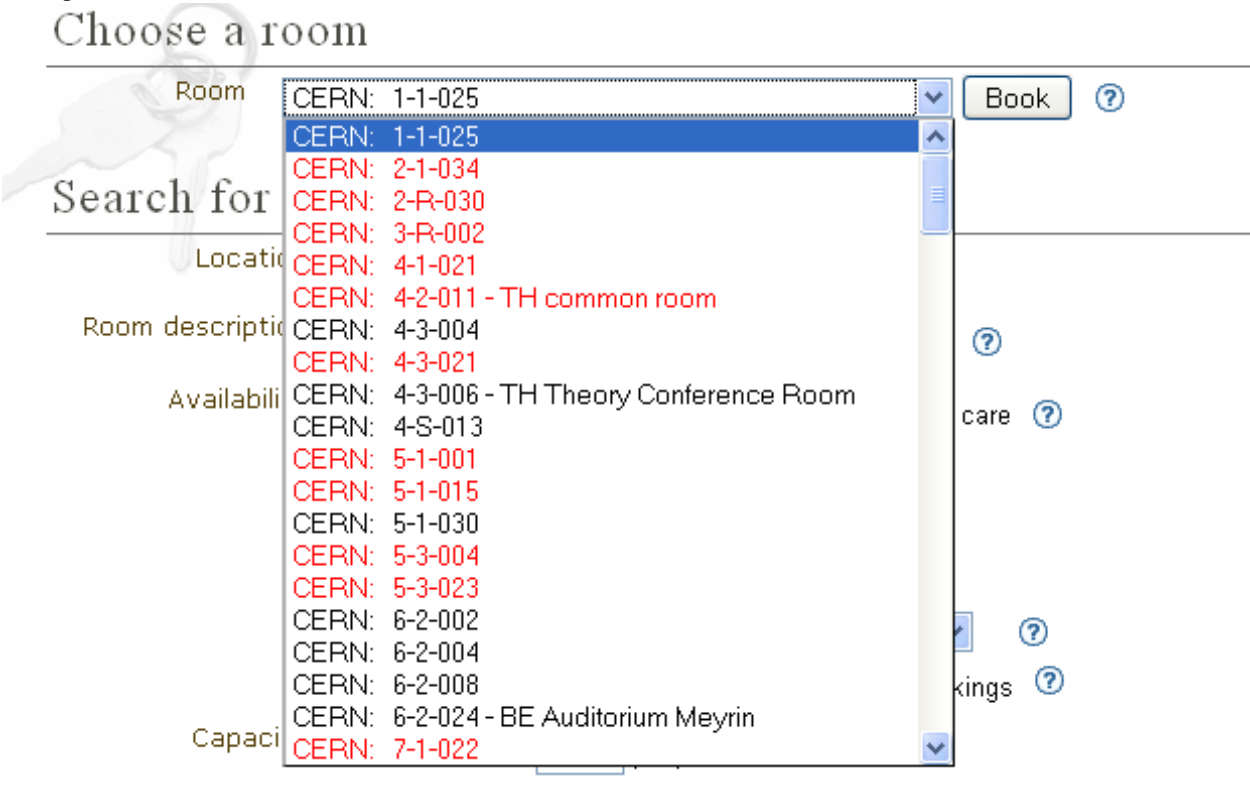

Feeling lost? Point at the question mark icon  with your mouse to see context help. Context help is meant to answer most of your questions along the way. It is always there waiting for you.

7.2.4 7.2.4. Room Names

If a room does not have a name, the default one is built according to the following pattern:

“location: building-floor-room”

Examples: “CERN: 304-1-001”, “Sheraton: 0-34-013”.

7.2.5 7.2.5. Three Kinds of Room

There are three kinds of room. They determine how much freedom users have.

- **Public rooms which do not require confirmation (black/green colour).** This means all bookings are considered accepted.
- **Public rooms which do require confirmation (orange colour).** You can PRE-book them and wait for acceptance or rejection.
- **Private rooms which cannot be booked at all (red colour).** Only the room manager can book his/her private room. If you need such a room, you should ask this person to insert a booking for you.

Room

Location	Location CERN Name 1-1-025 Site Meyrin Building 1 Floor 1 Room 025

Equipment	Room has: Blackboard, Ethernet, Telephone conference capability, Wireless	
Actions	<input type="button" value="Book"/> <input type="button" value="Stats"/>	

7.2.6. Six Types of Booking

There are six types of booking. They allow you to define different types of recurring reservation. A common example is a weekly meeting (which takes place at the same time every week). You can choose from:

- *Single day*: not recurring, one-time event
 - *Repeat daily*: use if you want to book many subsequent days, like the whole week
 - *Repeat once a week*: the booking will take place every week, always on the same day
 - *Repeat once every two weeks*: as above, but repeats every two weeks
 - *Repeat once every three weeks*: as above, but repeats every three weeks
 - *Repeat every month*: allows you to do bookings like ‘first Friday of each month’, ‘second Wednesday of each month’, ‘fourth Saturday of each month’, etc.
-

7.2.7 7.2.7. Booking a Room

Basically there are two steps: selecting a room and filling in a booking form. More detailed steps are:

- On the main Indico page, click the *Room Booking* menu option. This is your entrance to the Room Booking Module.
- Click the *Book a Room* menu option.
- If you know which room you want, simply select it and click [Choose]. You will be taken directly to the booking form.
- If you don't know, take advantage of room searching. Specify dates (click the orange calendar icon to choose the day with a mouse). Specify hours and booking type (single day or repeating). Specify also other criteria the room must meet, like capacity and necessary equipment. Then click the [Search] button (there are two for convenience, both will do the same).
- You will be presented with a list of available rooms meeting your criteria.
- Click the *Book* link on for the room of your choice.

NewBooking

Room	Name Conf. Room 57/2 Interior  Room key 74860 ?
When	Start Date <input type="text" value="3/7/2009"/> End Date <input type="text" value="3/7/2009"/> Hours <input type="text" value="08:30"/> — <input type="text" value="17:30"/> Type <input type="text" value="Single day"/> ?
Booked for	Name <input type="text" value="ANGELOVA, Csvetelina"/> ? E-mail <input type="text" value="csvetelina.angelova@cern.ch"/> ? Telephone <input type="text"/> ? Reason <div style="background-color: #f0f0f0; height: 40px; width: 100%;"></div> ?
Actions	<input type="button" value="Re-check for conflicts"/> <input type="button" value="Book"/> (<input type="checkbox"/> skip conflicting dates ?)

Conflicts

No conflicts with confirmed bookings, press the "Book" button to save your booking.

- Fill in a booking form. If you have searched for rooms, most fields are already filled in for your convenience. These data come from the searching form. After filling in the form, click the [Re-check for conflicts] button.
- Scroll the page down to have a look at conflicts. Scroll more to see the room availability calendar. Your booking is represented by a green bar or dark red bar if it overlaps with existing bookings, which are pink, by the way. This graphical room preview is useful mainly when you do a recurring booking. Give it a try: set the when/type attribute to *Repeat once a week*, set the end date to be at least 2 months after the start date, and click the [Re-check for conflicts] again. See the room calendar in its full glory.
- If your booking conflicts with others, you have two options:
 - In general, you will prefer to resolve conflicts manually: by changing dates, hours or maybe trying another room.
 - The alternative is to automatically book everything except conflicting days. This may be useful if you do long-term, recurring booking, for example, *whole year, every week*. Imagine everything looks perfect, except for several weeks when the room is not available. In this case check the 'skip conflicting dates' option to book everything except problematic dates.

- Click the [Book] button.
- If your form is OK, the system will ensure your new booking does not conflict with others. When no conflicts are found, you will be shown the confirmation page which lists details of your booking.
- Click *My bookings* from the menu. Your new booking now appears on the list.

Conflicts

6 conflict(s) with other bookings

10/07/2009	06	08	10	12	14	16	18	20	22	24

Note: some rooms require confirmation. These rooms are usually coded in orange. In this case, you cannot directly book them. You can only *PRE-book* such a room. PRE-booking works exactly the same way as booking. The only difference is that you must wait for acceptance from the room manager.

Note: you can always modify your booking (or PRE-booking). It will again be checked for conflicts.

Note: you can always browse your own bookings and PRE-bookings using the menu options *My bookings* and *My PRE-bookings*

7.3. Core Features and Constraints

7.3.1. Introduction

This section describes core capabilities and constraints of the Room Booking Module. It may be useful to assess whether it meets your needs.

Note that the Room Booking Module is NOT supposed to be a general-purpose “room management” or “room booking” software.

It was built with conference rooms in mind. Its main purpose is to make conference organization easier. We see room booking as a part of conference organization (but you can book rooms without defining an event).

7.3.2. Core Features

7.3.2.1. General

- Stand-alone and “in-conference” mode.
 - The stand-alone mode allows you to book, manage bookings and do administration stuff. You don’t have to create an Indico event (the bookings will not be assigned to any Indico event).
 - The “In-conference” mode allows you to book rooms for your event. You can assign booked rooms to conference, lecture, meeting, session, contribution or break.
 - Recurring bookings (‘every day’, ‘every week’, ‘every 3rd Wednesday of a month’, etc).
 - E-mail notifications (to users and room managers, about every important action).
 - Three user roles: (1) Indico administrator, (2) room manager and (3) ordinary user.
 - Optional booking moderation. Each room may work in one of the following modes:
 - Bookings require explicit confirmation of room manager, *or*
 - Bookings are automatically accepted.
-

7.3.2.2. User

- Book a room
 - Manage own bookings (track, modify, cancel)
 - Search for rooms
 - Search for bookings (including archival)
-

7.3.2.3. Room Manager

- Accept and reject PRE-bookings (for his room)
 - Reject bookings (for his room)
-

7.3.2.4. Indico Administrator

- Switch on/off Room Booking Module
 - Configure room booking plugins in admin section
 - Add/remove location
 - Define room attributes specific to the location
 - Define possible room equipment specific to the location
 - Manage meeting rooms (add/modify/remove)
-

7.3.3. Constraints

The room must have its manager. It is not possible to define multiple managers for a single room (you can work around this by creating an Indico account shared by several people).

The room must have a defined building, which must be a number. This is mandatory. If you do not need building, put any number there (like '0'). If your building naming scheme has letters, we are sorry - the software is not flexible enough for you.

The room must have defined floor (alphanumeric) and room 'number' (alphanumeric in fact).

7.4. Dictionary

Room: meeting or conference room. Please note that the software is not suitable for managing other rooms, like offices, corridors, etc.

Location: physical location of rooms. Room custom attributes and possible equipment are defined on a location basis. Example: rooms at CERN may have different attributes and different equipment than rooms in Fermilab.

Booking: final reservation of a room. While considered final, it still may be rejected in case of emergency.

PRE-booking: unconfirmed reservation of a room. PRE-booking is subject to acceptance or rejection.

Room responsible: the person who accepts/rejects bookings. Each room has exactly one person responsible. A person may be responsible for any number of rooms.

Room manager: room responsible

CHAPTER 8. EVENT EVALUATION

8.1 8.1. Introduction

With this evaluation module for Indico you can create your own online web survey in order to know participants' opinion about the conferences/seminars/lectures.

8.2 8.2. Functional goals

8.2.1 8.2.1. Security

Survey questions and statistical results are neither vital nor confidential for CERN members. We believe standard precautions are enough within this application. A survey will inherit access and modification rights from the event it belongs to. In other words, only users who are allowed to see an event will be able to have access and fill in the evaluation form. The survey can only be altered in the Management Area. This means that only users who are already allowed to edit an event can modify the corresponding survey and view the statistical results.

8.2.2 8.2.2. Usability

The main possible actions for the **surveyor** (*management area*) are the following:

- Create/edit an evaluation form concerning an event.
- Edit its options and status (visible/hidden).
- Possibility of setting that only logged users have access to the form.
- Create/edit questions contained in this form.
- Ability to preview a form while editing it.
- Import/export an evaluation in order to back it up or facilitate further creations.
- See the statistics of the results.
- Export statistics to a CSV file.
- Possibility of seeing/deleting individual answers in the results.
- Ability to send the evaluation link automatically by email to the participants at the start.

- Possibility of editing a survey in process even if some people have already answered it.

For a **submitter** (*display area*):

- Access to the survey via the menu of an event.
 - Logged users can always modify their already submitted forms.
-

8.3 8.3. Interface

8.3.1 8.3.1. Management Area

In the *Evaluation* option we have four tabs: *Setup* | *Edit* | *Preview* | *Results*.

8.3.1.1. Setup

In this section you can set the main information and configuration about the survey. Click on  to set your options.

Setup	Edit	Preview	Results
Current status VISIBLE (not open yet)  			
Evaluation start date	Thursday 18 February 2010		
Evaluation end date	Sunday 26 December 2010		
Title	Evaluation for Important Meeting		
Contact info	me@mail.com		
Announcement	Evaluation for an example		
Max number of submissions	--No limit--		
Notifications	start of evaluation 		
	To: me@mail.com		
	Cc:		
	new submission 		
	To: me@mail.com		
	Cc:		
Must have an account	No 		
Anonymous	No 		
			
Special Actions	 Export the evaluation with its questions to an XML file.		
	 Import an evaluation from an XML file.		
	 All collected answers will be erased.		
	 All questions will be erased. As the submissions are connected to them, they will also be removed!		

- **Curent status:** When an evaluation is HIDDEN (default), it is not shown in the Display Area and guests cannot answer it. On the other hand, it is shown if set to VISIBLE. But be aware that if you want your survey to

work properly it must be open and contain some questions. To show/hide it, simply click on

HIDE

SHOW

- **Notifications:** You can set email addresses of people you want to be notified when the evaluation starts and/or when someone answers the form. *Advice:* In the modification panel, check *Add current registrants* if you want your event participants to be notified of the start of the evaluation.
- **Must have an account:** If an account is needed, visitors must first log in before accessing the form.
- **Anonymous:** When anonymous, logged submitters send their form anonymously. Otherwise their identity is known by the surveyor. *Note:* Users not logged in can always send their form anonymously. If you really need to know the identity of all your submitters, you have to check *Must have an account*.
- **Special Actions:**

export evaluation

- Export the evaluation with its questions to an XML file. Useful for backing up or transporting. *Note:* If the file is directly shown in Firefox/InternetExplorer6, save it with: *File > Save as...* To solve the same problem in InternetExplorer7: *Page > Save as...*

import evaluation

Evaluation importation

• main setup configuration ?

- ☒ keep current one
- ☐ overwrite with imported one (loss of data!)

• questions ?

- ☒ keep only current ones
- ☐ keep only imported ones (loss of data!)
- ☐ keep both

import

cancel

- Import an evaluation from an XML file.
Concerning the main setup configuration (all the main information, e.g., title, announcement, etc.) you can choose to keep your current one or to overwrite it with an imported one. For the questions, you can keep only your current ones or only imported ones or have both (imported ones just after current ones). *Advice:* We suggest that you back up your current evaluation (with export feature) before importing in order to prevent loss of data. *Notes:* In order to prevent some misunderstanding the status and the dates are not imported. Be aware that as questions and submissions are bound, you will also lose your current

submissions if you get rid of your questions.

remove submissions

- All collected answers will be erased.

remove questions

- All questions will be erased. As the submissions are connected to them, they will also be removed!

reinit evaluation

- Delete all evaluation informations, its questions and its submissions. You will have a brand new evaluation.
-

8.3.1.2. Edit

In this section you can add/edit/remove the questions in your form. On the left panel you have six different types of question you can add.

Text box

- **Textbox:** A standard field where your submitter can enter some text as answer to the provided question. Here is a little example of a question of type Textbox.

1. what is your name?

Textarea

- **Textarea:** Like Textbox but with more capacity for text. Suitable for long answers like comments, feedbacks,

2. Do you have some feedbacks

etc.

Password

- **Password:** Like Textbox but the answer is hidden. For example on the picture below, it is recommended that the answer is hidden if the submitter is in a public area. Otherwise anybody next to him would be able to read the password on the screen. Note that the evaluation module doesn't use https, as all this information is not supposed to be confidential.

3. what is the password given during the event

Select

- **Select:** A drop down list which lets the submitter select one answer.

4. how many children do you have

▼

- 1
- 2
- more

Radio

- **Radio:** A group of radio buttons which lets the submitter select one answer.

5. who is the president of the USA

- ☐ george washington
☐ bill clinton
☐ al gore

☒ Checkbox

- **Checkbox:** This type is suitable for multiple-choice questions. You can check many answers.

6. whici transport do you use

- ☐ foot
☐ bus
☐ train

When adding a Textbox/Textarea/Password you have the screen below.

Required	<input type="checkbox"/> ?
* Question	<input type="text" value="what is your name?"/>
*Keyword	<input type="text" value="name"/> ?
Description	<input type="text"/>
Help	<input type="text"/>
Default answer	<input type="text" value="something"/>
Position in form	<input type="text" value="1"/> ▼
<input type="button" value="modify question"/> <input type="button" value="cancel"/>	

- **Required:** If checked, an answer for this question is mandatory.
- **Question:** Enter your question.
- **Keyword:** A keyword is the summary of the question in one word. (e.g. "What is your name?" -> "name") It's useful when exporting the statistics into a CSV file. Instead of writing the full question, we just write the keyword so that it takes less place.
- **Description:** Enter a description (optional).
- **Help:** Enter a help message (optional).
- **Default answer:** The answer to the question will already be filled in with this given default answer (optional).
- **Position in form:** The position of the question within the form.

On the following picture you can see the result of the manipulation.

* 1. what is your name?
 a little description ...

Required	<input checked="" type="checkbox"/> ?						
* Question	<input type="text" value="whici transport do you use"/>						
*Keyword	<input type="text" value="transport"/> ?						
Description	<input type="text"/>						
Help	<input type="text"/>						
Position in form	6 v						
*Choice Items ?	<table><tr><td><input type="checkbox"/></td><td>foot</td></tr><tr><td><input checked="" type="checkbox"/></td><td>bus</td></tr><tr><td><input type="checkbox"/></td><td>train</td></tr></table> <div>+ x</div>	<input type="checkbox"/>	foot	<input checked="" type="checkbox"/>	bus	<input type="checkbox"/>	train
<input type="checkbox"/>	foot						
<input checked="" type="checkbox"/>	bus						
<input type="checkbox"/>	train						
<div><input type="button" value="modify question"/> <input type="button" value="cancel"/></div>							

When adding a Select/Radio/Checkbox you have the above screen. Note that some fields have already been described above, that's why they are not explained here.

- **Choice Items:** Choice items are answers that can be selected. *Note:* Check the box next to a choice item, to set it to be a default answer.

On the following picture you can see the result of the manipulation.

* 6. Which transport do you use?	<input type="checkbox"/> foot
	<input checked="" type="checkbox"/> bus
	<input type="checkbox"/> train

The screenshot shows a list of six questions in the Indico interface. Each question is displayed in a separate box with a title, a question number, and a position indicator (1-6). The questions are:

- 1. What is your name?** (Text input field)
- 2. Do you have some feedbacks** (Text area)
- 3. What's the password given during the event?** (Password input field)
- 4. how many children do you have?** (Dropdown menu)
- 5. Who is the president of the USA?** (Radio buttons for George Washington, Bill Clinton, and Al Gore)
- 6. Which transport do you use?** (Checkboxes for foot, bus, and train)

Each question box includes a position indicator (1-6) and icons for editing and deleting the question.

After having first added some questions, here is an example of the questions overview (see above picture). You can change the position of a question within the form by clicking on . Press to edit a question and to remove it.

8.3.1.3. Preview

In Preview you can see what your evaluation really looks like in the display area. Feel free to play with this form, submitted information won't be recorded.

8.3.1.4. Results

In this section we have the statistics. There are two panels called *Options* and *Statistics*.

In the first one you can select which submissions you want to see, remove some of them, and export all the results into a CSV file.

To import a CSV file into Microsoft Office Excel: *Data > Import External Data > Import Data...* > select your CSV file > *Next* > Uncheck *Tab* and check *Comma* > *Next* > *Finish* > *OK*.

In the second, you see the collected results of your evaluation shown as graphs or as answer lists depending on the question type.

Answer lists shown for Textbox/Textarea/Password. (See [Section 8.3.1.2](#))

1. what is your name?

- anna
- peter
- someone

6. whici transport do you use

Graphs shown for Select/Radio/Checkbox. (See [Section 8.3.1.2](#))

8.3.2 8.3.2. Display Area

For a conference, you can access an evaluation via the left menu.

For a meeting/lecture, you can access it via the top menu.

The screenshot shows the Indico interface for an event titled "Meeting 1". The header is blue and contains the event title, the date and time "Friday 03 July 2009 from 08:00 to 18:00 (UTC)", and an "iCal export" link. Below the header is a "Manage" button with a dropdown arrow. The main content area has a light gray background and contains two sections: "Material" with a "text" button and a document icon, and "Evaluation" with a link "Evaluate this event".

CHAPTER 9. PROTECTION SYSTEM

9.1 9.1. Introduction

This section aims to describe the protection system used by Indico to grant or restrict access to users.

9.2 9.2. Basic Concepts

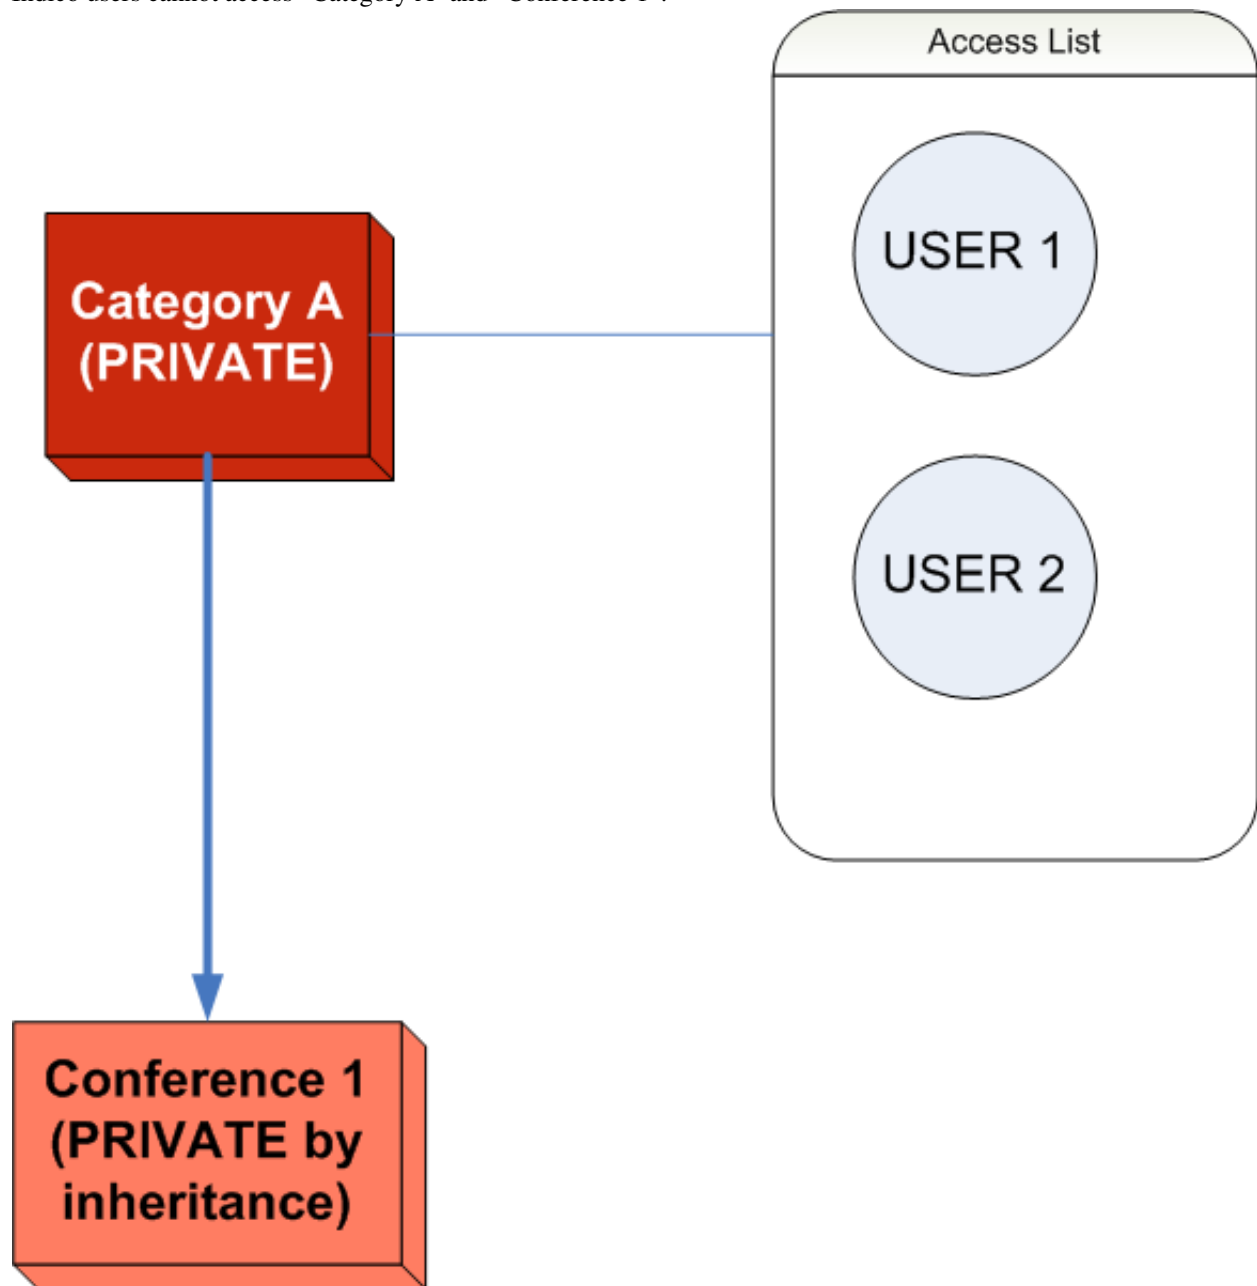

9.2.1 9.2.1. Inheritance Schema

You can set up a protection policy for almost all the objects that you can create within Indico. This protection policy is based on an inheritance system, meaning that an object is going to inherit the protection from its father, e.g., a contribution can be public but becomes private if we set up its container (a meeting) as private.

The protection objects tree is as shown in the following picture:

As we can see, a **File** inherits the protection policy from *Material*, *Material* from *Contribution*, *Contribution* from *Session*, *Session* from *Event*, *Event* from *Sub-category* and *Sub-category* from *Category*. The next picture shows an example of this inheritance system. “Category A” is PRIVATE and because of this, “Conference 1” becomes PRIVATE too. As User 1 and User 2 are in the access list for “Category A” they can also access “Conference 1”. The rest of Indico users cannot access “Category A” and “Conference 1”.

9.2.2 9.2.2. Protection Types

For each object (category, conference, contribution, session, etc) in Indico, one can set up three kinds of protection: modification control list, access control setup, and domain control.

- The modification control list contains all the users or groups that can edit and modify an object. Therefore, people in this list will be the managers for the object and they can access all the pages related to it and the objects under it.
 - Access control setup: by default, an object is public but we can make it private and add restrictions as shown in the section [Access Control Policy](#).
 - Domain control: one can protect an Indico object to be accessed only by users who are connected from some given IPs (see [Domain Control Policy](#)).
-

9.3 9.3. Access Control Policy

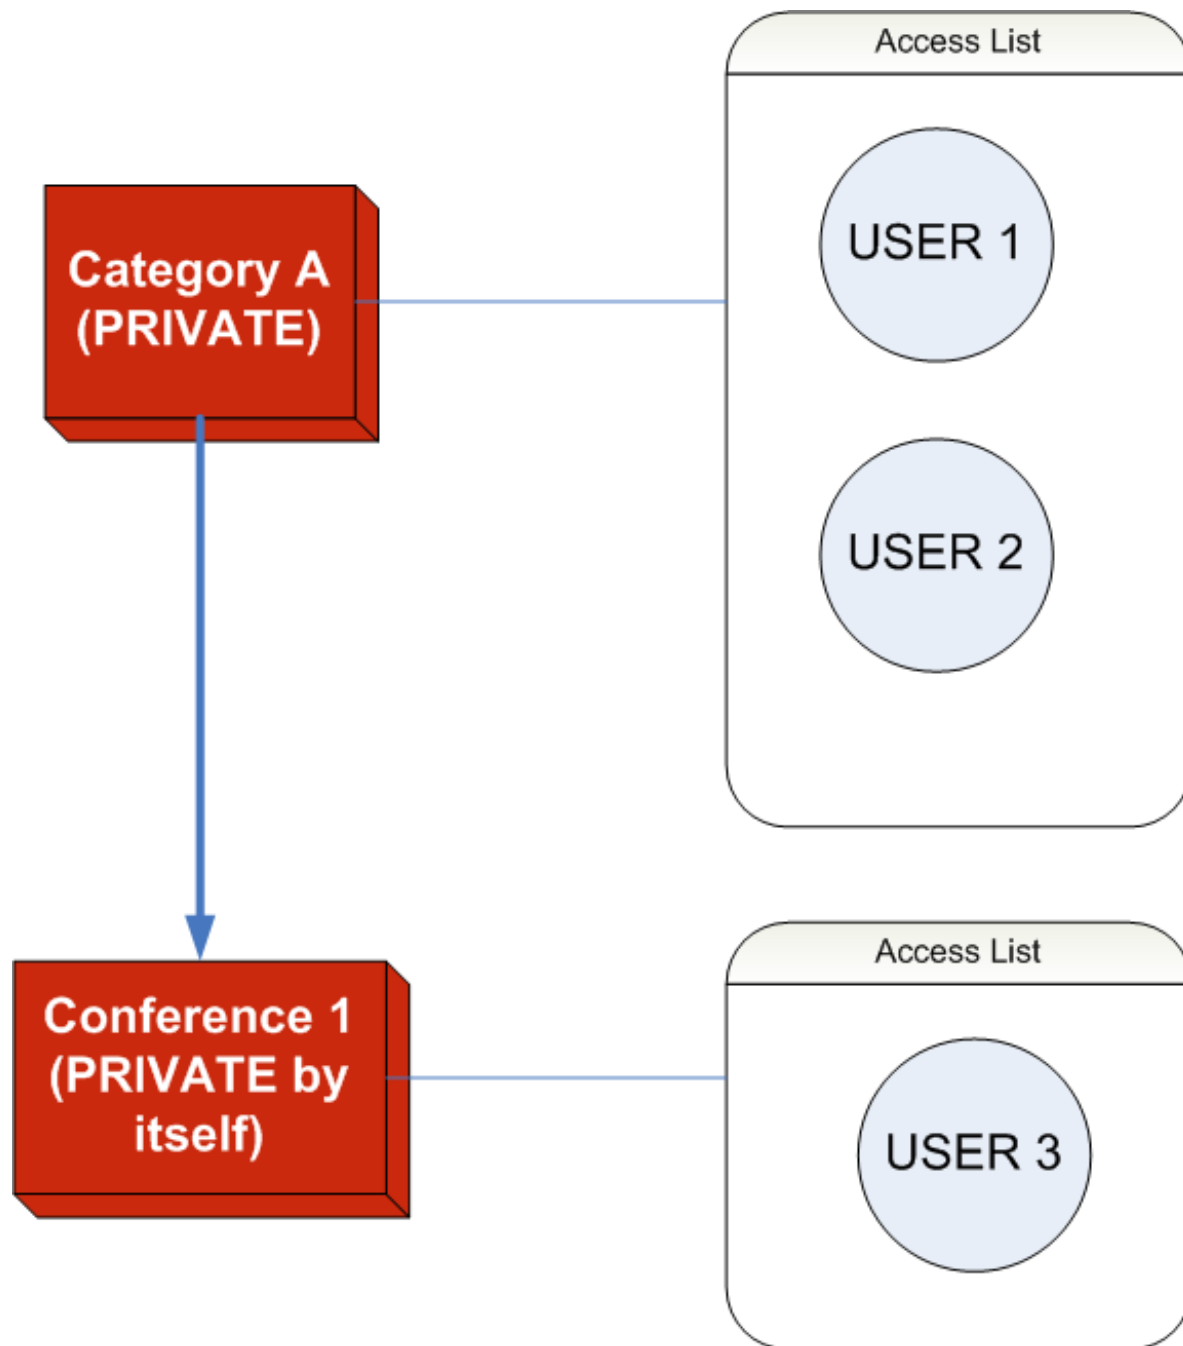

By default, all the objects (category, event, session, contribution, material, file and link) in Indico are **PUBLIC**.

We can set an object as **PRIVATE** and this means that all the objects under it will be **PRIVATE** as well.

If an object is **PRIVATE**, nobody can access it but the managers, the users/groups in the access list named “Users allowed to access” and those who know the “access key” if set.

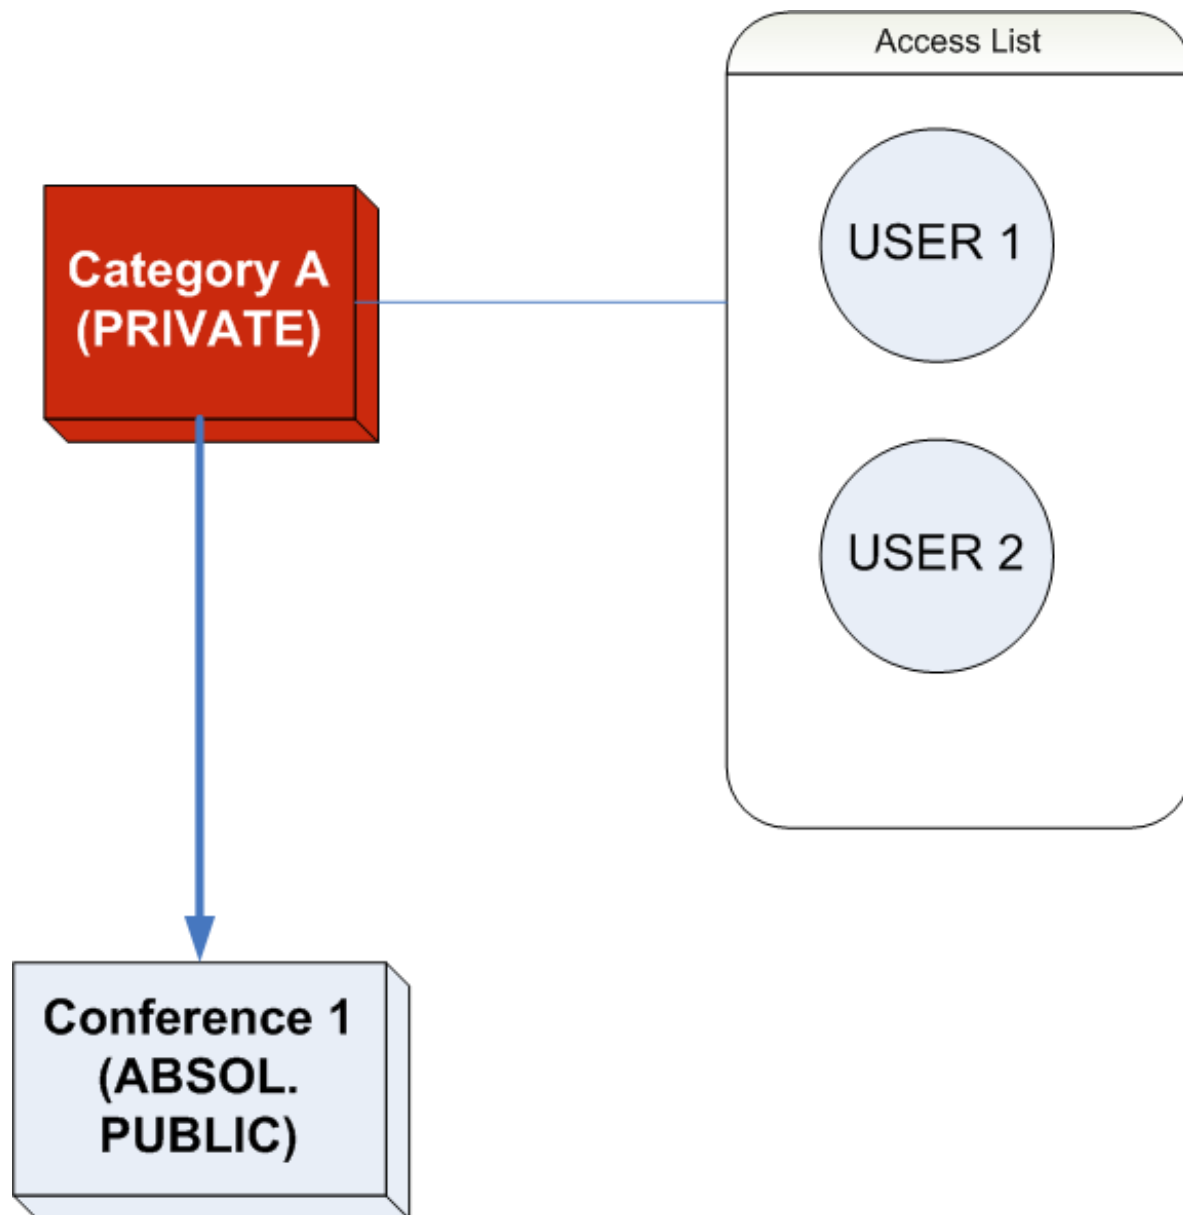

If an object is **PRIVATE by inheritance**:

- Nobody can access it but the managers and the users/groups in the access list “Users allowed to access” **of its father** (as example, see section [“Inheritance Schema”](#)).
- We can set the **PRIVATE** object as **PRIVATE by itself**, which means that Indico checks only its protection policy and not the father’s protection policy.

In the graphic, “User 1” and “User 2” can access “Category A” but they cannot access “Conference 1”. Only “User 3” can access “Conference 1”.

- We can set the PRIVATE object as **ABSOLUTELY PUBLIC**, which means that Indico skips the protection that was established by inheritance.

In the graphic, only "User 1" and "User 2" can access "Category A", but everybody can access "Conference 1".

9.4 9.4. Domain Control Policy

If an Indico object (category, event, session, contribution, material, file and link) is PUBLIC, we can restrict the access to users accessing Indico from some given IPs (these IPs could be like 127.1 which means that every IP starting like this will be valid).

If the Indico object is PRIVATE, this checking will not be applied.

If you wish to add special access to some users, meaning that the domain control will not be applied for those users, you can add them in the "Users allowed to access" list.
